1988

Mr. Jack Parnell, Director
Calif. Dept. of Food & Agriculture

- and -

The Honorable Board of Supervisors
County of Kern

I am pleased to submit this 1988 Agricultural Crop Report, which was compiled in accordance with Section 2279 of the California Food & Agriculture Code.

Cotton remained the number one producer even though suffering a 13% decrease in value caused by lower production and price.

Grapes increased by 23%, falling about 5 million short of the cotton value.

The largest increase was 63-1/2% recorded for Apple production. Prices were up and production increased significantly because of recent plantings of Granny Smith variety coming into production.

Other crops bringing increases of more than 50% were: 1) Melons (other); 2) Pistachios; 3) Plums and 4) Sugar Beets.

Other crops showing largest losses were citrus, lettuce, potatoes and onions.

While the total value was \$1,511,805,000 an 8.7% increase over 1987, it is important to realize that these are **GROSS** receipts of producers and **DO NOT** take into account the various costs of production, marketing or transportation. **NO ATTEMPT IS MADE TO REFLECT NET INCOME OF THE PRODUCER.**

My sincere thanks to the individuals whose cooperation made this report possible; and especially to Agricultural Biologist III, Sharon Wilbur, who compiled the report.

Respectfully submitted,

A handwritten signature in cursive script that reads "Robert A. Edwards".

Robert A. Edwards
Agricultural Commissioner

RED GLOBE

The Red Globe is an attractive new seeded table grape variety. It was introduced by Dr. H. P. Olmo of the University of California in 1980, the same year he brought out Christmas Rose. Each of these varieties was developed from the Emperor grape.

In spite of the fact that consumers are known to prefer seedless varieties, Red Globe was brought out to anticipate the season for red grapes. It matures before the Emperor and holds well in cold storage conditions. An extremely popular export variety, half the crop is shipped to the Far East where the large berries are highly prized.

Like the Emperor, the Red Globe vines thrive in the soil and climate of California's central grape growing region. These vines are highly productive but require a certain amount of special care. The thin skin so valued by consumers must be protected from direct afternoon sun by a wide cover of leafy vines. The bunches are heavy with fruit and may need support. The result is worth the care needed. Red Globe is a highly unusual grape, sure to find favor with those who delight in a mild sweet taste.
