**SUMMARY INFO -**

All commodities eligible for phytosanitary certificates require a Federal Phytosanitary Certificate. No Additional Declarations are required or authorized.

There are no Unrestricted or Prohibited products.

**Potatoes for consumption:** Phytosanitary certificate (PC) is required. Must be free of *Globodera pallida* (potato cyst nematode), *G. rostochiensis* (potato cyst nematode), *Synchytrium endobioticum* (Black wart) and *Corynebacterium sepedonicum* (ring rot) based on area freedom.

**Additional Declarations required:** "The tubers in this shipment were sourced from an area free of *Globodera pallida* (potato cyst nematode), *Globodera rostochiensis* (potato cyst nematode) and *Corynebacterium sepedonicum* (ring rot). *Synchytrium endobioticum* (Black wart) is not known to occur in the United States."

**Potato seeds:** Phytosanitary certificate is required. Must be free of Potato spindle tuber viroid.

Additional Declaration required: "The seeds in this shipment were inspected and found to be free of Potato spindle tuber viroid."
